PALLETIZER SERIES 4000

The palletizer series 4000 is designed for throughputs from 2,500 to 4,000 bags/hour. This automatic palletizer series is particularly suitable for the building materials industry.

Our advantages :

■ Features

- bag palletizer with layer deposit for high capacity from 2,500 to 4,000 bags/hr
- bag orientation with turning device
- conveyor belts equipped with drum motors
- Pre-grouping belt for step-by-step preparation of the bags in row

■ Maintenance

- easy maintenance
- modem or VPN connection
- low maintenance cost

■ Operational

- HMI allows manual operations and modification of all parameters of the machine
- this series can be completed with additional options (pallet press, deposit of PE film, deposit of bottom sheets onto empty pallets or interlayer sheets)
